Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/24/03 has been entered.
2. Claims 1-33 are pending and are examined. Amendment E has been entered.

Priority

3. The status of the parent application Serial No. 09/351, 224 should be updated.

Claim Objections

4. In claims 1 and 19, line 2, it is suggested that ---in a plant cell--- be inserted after "fumonisin", for clarification.

Claims 1, part (a), and claim 8 recite "first promoter" when no second promoters are recited in parts (b) and (c) of claim 1. Appropriate correction is required.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 10 and 18-20 are indefinite in the recitation of a "third" nucleotide sequence. Since step 2 is optional, the nucleotide sequence of step 3 is not always a third nucleotide sequence. Therefore, the recitation of a third nucleotide renders the claims indefinite because the second nucleotide sequence is in optional step 2. Dependent claims 2-9, 11-17, and 21-33 are included in the rejection.

Claims 5-7 are indefinite because "said plant" lacks antecedent basis in claim 1. Claim 1 recites "plant cell" rather than a "plant".

Remarks

7. Claims 1-33 are free of the prior art of record because the prior art does not teach or reasonably suggest a method of cotransforming plant cells with a first nucleotide sequence of SEQ ID NO: 16, 18, 20, 22, 24, 26, 28, 30 or 32, optionally a second nucleotide sequence of SEQ ID NO: 12 or 14, and a third nucleotide sequence of SEQ ID NO: 2, 4, 7, 10 encoding SEQ ID NO: 17, 19, 21, 23, 25, 27, 29, 31, 33, 13, 15, 3, 5, 8, or 11, respectively or sequences having at least 95% sequence identity thereto, nor that the prior art teaches plants and plant cells stably transformed with said nucleotide sequences.

8. No claim is allowed.
